

HOW TO MAKE YOUR OWN LEMON SUGAR SEALANT:

* TO BE APPLIED ONLY AFTER INITIAL APPLICATION OF HENNA HAS DRIED

- Mix 2 teaspoons (2 tsp) of sugar and 1 tablespoon (1 tbsp) of warm lemon juice together until sugar has fully dissolved.
- Gently dab a cotton ball or a cotton pad directly on your dried henna paste.
- Once you've applied the mixture (sealant), allow time for it to air dry. (It may take another 30 min or so to dry).

Applying this helps to darken the henna on the skin.

It is recommended to apply this to the henna prior putting on any films or skin tape to cover up your henna.
